

## **6.4L Power Stroke® Diesel Delivery Checklist**

VIN: \_\_\_\_\_

***Congratulations on the purchase of your new Ford vehicle with a 6.4L diesel engine! The 6.4L Power Stroke® uses some of the most advanced technology available – proper use and maintenance are important in caring for the engine.***

Delivery checklist:

- The 6.4L requires Ultra Low Diesel Fuel (ULSD).
- Biodiesel fuel is permitted in the 6.4L, but must not exceed 5% (B5).
- New CJ-4 engine oil is required (API service category CJ-4 or CJ-4/SM).
- The Water Separator should be drained monthly.
- The Engine Block Heater should be used at temperatures below -10° F (-23° C).
- The installation/use of any non-Ford product will not necessarily void the Ford New Vehicle Limited Warranty. If, however, the non-Ford product (e.g. performance chips, modified exhaust, etc.) fails or causes a Ford part to fail, the cost of the repair and any related damage are not covered by the Ford New Vehicle Limited Warranty. The vehicle owner would need to look to the manufacturer or installer of the non-Ford product for repairs.
- The all-new, more powerful 6.4L diesel has increased horsepower and torque and meets the new cleaner emissions standards. Depending on the truck's use and payload, fuel economy will vary.
- During the first 500-1,000 miles (800-1,600 km) of operation, limit speeds and loads.
- Oil and oil filter change intervals:
  - Normal Operation – 10,000 miles
  - Severe Service Operation – 5,000 miles or 200 hours  
(Towing, Long Idle/Commercial Delivery, Off Road/Dusty, Biodiesel)
- Fuel filters (two) change intervals:
  - Normal Operation – 20,000 miles
  - Severe Service Operation – 10,000 miles or 400 hours  
(Towing, Long Idle/Commercial Delivery, Off Road/Dusty, Biodiesel)
- Additional resources are available for proper maintenance guidance:
  - Maintenance DVD, Owner's Guide, and Diesel Supplement (all in glovebox)
  - Dealership Service personnel
