Shockwave Flash is installed

Shockwave Flash is required to view Graphical Workshop Manuals and Demo for Wiring Diagrams

Service publications in the past were accessed by using the left-hand navigation and clicking on the service publication type, selecting a year and model, and then accessing your publication type. This would have to be done numerous times for each vehicle entered and every service publication type you wished to view.

The process has been streamlined as shown here. Service publications will now be accessed directly from your "My Subscriptions" area.

No longer will you have to re-select a year/model for each publication type you wish to view. Selecting the year/model one time will now provide you with a tab view of all related service publications for the selected vehicle type as shown below.
